# \$867,000 FOR

CARRY OUT VARIOUS FED-ERAL PROJECTS.

#### MOST OF MONEY FOR THE INDIANS

Fifty Thousand To Be Spent On Cherokee School at Tahlequah. -\$250,000 for Indian Schools. -Few Federal Buildings.

Washington.-More than \$367,000 will be spent in Oklahoma by the goyernment for various purposes during the next fiscal year, the secretary of the treasury calling for this amount in his annual estimate forwarded to congress. The largest part of this sum is appropriated for the care of tht Five Civilized Tribes, but other Indians over the state are cared for, in some instances the amounts asked being increased several thousand dollars over the estimates for the past fiscal year, which ends in June.

Heeding the demands of the mem bers of the Five Civilized Tribes that expenses of administration be curtailed only \$225,000 is asked for this purpose. Last year \$250,000 was appropriated on recommendation of the department. Although the sum set aside this year is but \$25,000 smaller, give Oklahoma Indians justice. In previous years, ever since the present system of administration was established, the expenses of administration in the Five Civilized Tribes has been increased instead of decreased,

The Cherokee Orphan Trainign school near Tahlequah is given \$50,-900. Of this amount, \$35,000 is to be spent in repairs and improvement, so that the institution may properly be conducted as an industrial school.

For the maintenance of the common schools of the five tribes only \$250,000 is set aside this year as against \$300,-300 last year. When the appropriaion measures get on the floor of both the senate and house, it is certain that Oklahoma members will wage a fight to have this amount increased to its old proportions.

For the support of the Wichitas and affiliated bands, \$5,000 is recommended; support of the Cheyennes and Arapahoes, \$35,000; support of the Kansas Indians, \$1,500; for support of the Kickapoos, \$3,000; for support of Poncas, \$8,000; for fulfilling treaties with the Pawnees, \$47,100; support of the Quapaws, \$1,500; pay of employes, Sac and Fox agency, \$3,000; pay of employes, Seneca agency, \$2,500.

The recommendations urge that Mexican Kickapoo Indians be paid such moneys as now are on deposit in the United States treasury under the control of superintendent of the Shawnee agency. Those under 18 years of age, however, will have their funds withheld. Fifteen thousand dollars is desired

for the payment of expense in connection with litigation inaugurated to set aside illegal conveyances of Seminole allotments, an increase from

As in the past, for the continuation of the federal building at Ardmore, \$20,000 is asked and \$10,000 is desired for the completion of the building at Chickasha. Five thousand dollars is asked for

both El Reno and Blackwell, this money to be uesd in the purchase of sites for proposed buildings.

Although no special appropriation is requested for the dredging of the Arkansas river to Tulsa, the sum of \$164,700 is desired by the board of army engineers for work all along the waterway. A good share of this will be used for snagging operations in the Oklahoma section in the river.

HIS COMMANDERS IN NORTHERN MEXICO SURRENDER.

Chihuahua Evacuated and Commanders Fleeing to the U. S. Border. Villa Begins Tirumphal March

Juarez .- Seven generals of the Mexcan regular army are ready to surrender and the backbone of the Huerta dictatorship in the north has been broken. A peace commission arrived in Juarez bearing terms of the sur-

The peace commission was headed by Odilon Hernandez and came from Chihuahua bearing a proclamation signed by General Salvador Mercado, Auerta's military governor and commander of the federal forces in all the north. The proclamation stated that the Huerta government is bankrupt and unable to pay its soldiers.

The simultaneous evacuation of other federal stronghouds in the north is believed by the rebels to be the result of a concerted decision to abandon the whole of northern Mexico.

The peace proposals were sent by General Mercado to General Francisco Villa, rebel leader, through Federico Moyo, civil governor of Chihuahua state. Along with it came an appeal signed by all the foreign consuls in Chihuahua, calling on Villa to give police protection to the citizens of Chihuahua city. General Mercado's proclamation reads:

"Under the circumstances which have existed in Chihuahua it has been deemed necessary for the federal troops to evacuate. I leave in charge Federico Moyo, a person who is not Identified with politics and who, therefore, is qualified to give full protection to foreigners. It is impossible to remain here longer, as there is no money with which to pay the troops."

The generals who have signified through General Mercado their willingness to surrender, but who, nevertheless, are fleeing to the United States border, are: General Salvador Mercedo, General Pascual Orozco, General Jose Ynez Salazar, General Marcello Caraveo, General Jose Manzilla, General Blaz Orpinal and General Landa.

The peace commission proposed to General Villa that all noncombatants who sought safety by fleeing to the border be permitted to go without be ing fired upon and all the federals, including 200 soldiers left on police duty in Chihuahua City, be pardoned. It also asked clemency for federal officials, but it is thought the federal generals will seek safety by crossing Barthou was defeated by a vote of the border into the United States, pos-250 to 265 in the chamber of deputies sibly near Ojinaga. Among Other Things It Affords Means of Conserving More of Food Value of Forage Crops.

(By C. H. HINMAN, Colorado Agricultural College.)

1. By means of the silo more of the food value of forage can be saved than any other method of preservation now in use.

2. In a large part of the Plains District of Colorado and all of the plains irrigated area it is possible to grow a large tonnage per acre of corn to the stage in which it should be placed in the sile, i. e., in that stage the nights too cold and the moisture insufficient to develop a large grain crop of corn. This forage can be sayed by the silo.

3. The silo affords the means of keeping, in small compass, a large quantity of forage safe from the weather and in convenient form to feed.

4. Forage placed in the silo keeps at a uniform quality, whereas fieldcured forage constantly deteriorates. 5. Considering the food value saved. the silo affords the cheapest means

for forage preservation. 6. Because of the palatability and succulence, silage possesses higher feeding value than does the same forage dry cured. Conservative feeders estimate that the silo doubles the

value of the forage crop. 7. Not only corn, but kafir corn, Milo maize and serghum are adopted for use in the silo. All these crops have been successfully silved.

8. Silage can be used in summer and fall as a substitute for and to supplement pasture.

9. It has been conclusively proven that the silo effects a considerable saving in the cost of production of beef, mutton and milk.

10. The silo enables the farmer to keep more livestock, which promotes the rotation of crops and the preservation of the soil fertility.

#### CULTIVATION OF THE TREES

Task is Absolutely Necessary in Dry Farming Country-Weeds and Grass Must Be Choked Out.

(By NORMAN M. ROSS.)

When trees are planted in the dryfarm country constant cultivation is absolutely necessary until the tops of the trees grow together sufficiently to choke out all growth of weeds and grass. The rainfall in the prairie districts is so small that every means must be employed to preserve what little soil moisture there is. Surface cultivation is the best method of accomplishing this, as it keeps a loose covering of soil, which acts as a mulch, retaining the moisture in this way. The single horse scuffler or cultivator is the best implement for this purpose. The hoe is of little use by itself, except to cut off the larger weeds and for working close around the roots of the trees, as it does not stir the soil sufficiently unless a great deal of time is spent on the work.

The number of times it will be necessary to go through a plantation depends a good deal on the season. After a heavy rain, when the ground is dry enough, the cultivator should be always run through in order to prevent the formation of a crust. After the thire season cultivation should no longer be necessary. In any case, cultivation should always cease before the end of August each year so that the trees will not be encouraged to grow too late in the fall, as the early frosts would then be liable to cut back a large portion of the new wood.

Mulching with straw or manure is quite often done, but cannot be recommended unless it is absolutely impossible to find time to cultivate. Clean straw is better than manure, as it takes longer to decay, and weed seeds do not so readily germinate in

Owing to the strong reflection from bright straw many recommend hay as being the best for mulching.

ERADICATION OF POISON IVY

Children Should Be Taught to Carefully Avoid Any Surt of Climber With Three-Lubed Leaf.

Wage war upon the poison ivy and keep at least the home place free from it. Only the most drastic measures have any effect upon it.

sort of climber that has a three-lobed leaf. While poison tvy is not fatal in its effects and many people are immune from its attacks, it causes much unnecessary suffering and it often impairs the health.

Start a crusade against the pest among your neighbors and work against the common enemy. Dig or plow it up to the smallest root and branch, for it is so tenacious of life that a twig allowed to lie upon the ground has been known to take root If every root cannot be dug, touch the broken end with crude oil or some strong acid. E. V. B.

Breed Best Horses.

Buyers of all classes of horses are becoming much more exacting and discriminating every year; so the importance of breeding only the very best is more and more apparent.

Lambs at Weaning Time. When weaning time comes put the lambs in a fresh, green pasture out of hearing of the ewes. Put a dry, gentle ewe with the lambs. From her they will learn to come at call

### TEN REASONS WHY FOR SILO MANITOBA CROP YIELDS

Gladstone, Man., reports that the wheat crop of 1913 exceeded all expectations, 30 bushels per acre was the general yield. The grade was never better. One farmer had 400 acres in wheat, which weighed 66 pounds to the bushel.

On Portage Plains, Manitoba, there were some remarkable yields. Noah Elgert had 61 bushels of wheat per acre; the government farm, 61 bushels; Geo. E. Stacey, 54; T. J. Hall, John Ross and D. W. McCuaig, 50; W. Richardson, 51; M. Owens, 611/2; Anderson and Turnbuil, on; J. Lloyd, of maturity known as the "dough 481/2; Jas. Bell and Robt. Brown, 48; state;" while the season is too short, R. S. Tully, 52; J. Wishart, 4914; Philip Page, 47; J. Stewart, 45; J. W. Brown, 30; Chester Johnson, 44; E. H. Muir, 42; L. A. Bradley, 43; W. Boddy, 40; Albert Davis, 43; E. Mc-Lenaghen, 37; farming the same land for 40 years, J. Wishart secured a crop of 4912 bushels to the acre, the best he ever had, and the yield of Mr. Bradley's was on land plowed this spring.

Marquette, Man., Sept. 21.-Splendid weather has enabled the farmers of this section to make good progress with the cutting and harvesting of this season's crop. Wheat is averaging twenty bushels to the acre, with barley forty-five and oats going seventy. There has been no damage of any description.

Binscarth, Man., says: Good reports are coming from the machines of high yields and good sample. The elevators are busy shipping cars every day.

Dauphin, Man., Sept. 13.-Threshing . is general the grain is in good shape and the weather is ideal. The samples are best ever grown here, grading No. 1 Northern. The returns are larger than expected in nearly every case. E. B. Armstrong's wheat went thirty-four bushels to the acre, others

twenty-five to twenty-seven. Binscarth, Man., Sept. 3.—Cutting is finished here and threshing is in full swing. This part of the province is keeping up its record, wheat averaging twenty-five bushels to the acre.-Advertisement
